SUMMARY

With an eleven-year of experience in Iran's software development field, I am continually looking for scaling and business challenges. I am now looking to bring my positivism and expertise to a company in the long run.

My path started after graduating from computer software engineering from Islamic Azad University for thirteen years, practicing and working exclusively in the enterprise applications area, putting my knowledge into developing in communication, marketing, e-commerce. I then followed my passion for learning by working in ArvandCloud company, where I worked for a year and a half and worked as a senior PHP developer (Laravel Framework).

I had the opportunity to collaborate with international teams and work as a backend developer too.
